

MicroFIT 10 Rooftop Solar Systems

Price: 9.6 KW Bundle \$50,500
plus delivery & HST
Installation is extra

Price: 7 KW Bundle \$38,410
plus delivery & HST
Installation is extra

Other bundle sizes are available ranging from 2 KW up to 10 KW. Bundles include CSI CS6P 230 watt solar panels, inverters, rack hardware, cables, and combiner box hardware, all made in Ontario. Warranties by Canadian Solar Inc on panels, inverters and racks. Enphase micro-inverters are an option for a slight premium. All systems are sold either as a bundle shipped to your house or we can quote an installed price. Installation needs on-site estimating, which we are glad to offer.

These investments exceed long term stock market performance! They involve a 20 year fixed price agreement with the OPA to sell the energy. Whatever you produce, the Province will buy. No moving parts, low operating costs and no fuel costs.

About 3G Energy Corp.

3G Energy Corp. is an Ottawa, Ontario based renewable energy project developer with 10 years of experience in wind and solar energy. We have three large ground mount projects in Eastern Ontario with **Feed In Tariff** contracts and we are steering these projects through the permitting phase. We also are exclusive vendors of the CanTrack™ Ground Mount 10KW Tracking System as well as vendors of Canadian Solar Inc equipment for residential and commercial rooftop applications.

Financing Options:

Please talk to us about TD Bank financing services. You will be pleasantly surprised.
